

# How is DermEngine supporting your care?

## What Is DermEngine?

A dermatology software powered by artificial intelligence for the imaging, documentation and analysis of skin conditions.

The system helps doctors manage cases like yours, so it's important that you understand how the platform's intelligent tools support your care!

## How Is Your Physician Using DermEngine?

During your visit, your physician will capture, document and review your skin images with the support of smart tools on DermEngine.

## What Are Smart Features?

These are anything that uses artificial intelligence to assist your medical professional in the decision-making process. Depending on the needs of your physician, this might look like:

### Spot Matching

Identifies potential changes to your spots

### Assign Images

Suggests which spot profile new images belong to

### Spot Mapping

Adds spots of interest to your digital body map

### Visual Search

Compares your case to a library of visually similar images

 **Add used data has been de-identified**

-  Patient's name
-  Date of birth
-  Health ID
-  Email

## How Can My Data Make A Difference?

Much like people, our system needs to be trained to improve over time. To support this process, DermEngine is trained on your de-identified data.

## What Is De-Identified Data?

This means that any identifiable information such as your name, date of birth, health ID, and email have been removed.

The best part? Our system keeps improving so it can **better serve you**, your doctor, and patients around the world!

## How Can I Opt Out?

We understand you might not want our system to be trained on your de-identified images, and we respect that.

### During Account Creation

When creating your digital profile, your care provider will have the option to opt you out of DermEngine's AI tools, at which point you'll receive an email confirming your request.

### After Account Creation

If you are already registered on DermEngine, you are able to submit an opt-out request at [www.dermengine.com/opt-out-form](http://www.dermengine.com/opt-out-form) and we'll take care of the rest!

This process is  
entirely automated

Only you and your  
doctor(s) can see  
your data!

It's important to remember that you are able to withdraw your consent at any time, however only data added after your opt out request is complete will be excluded from the algorithms' learning process.

Only data added to DermEngine after the opt-out request will be eligible for exclusion from algorithm training.

## How Can I Opt Back In?

We will be more than happy to have you back on board, saving lives one step at a time! You can always opt in again by simply filling out the form at [www.dermengine.com/opt-out-form](http://www.dermengine.com/opt-out-form)

It is our goal to help medical professionals provide an unmatched level of quality care, and that starts with your satisfaction.
